

# Price Action Decision Tree

Accept what you see. Don't deny your eyes!

## Market Cycle = Context

BO >> CH >> TR >> new BO

Step 1) EMA ~ 10 bars: Above/Bull, Below/Bear, Straddle/TR

Step 2) Count legs: Leg 1 = BO, trade 2nd leg  
Leg 2 >> Look left, TR or CH?  
Leg 3 >> Fade or do NOTHING\*

\*Override exception, small PB trend

- Market either Contracts (= TR) or Expands (= trend)
- Observe HOW each candle closes and size (notice body and wicks)
